

PowerBox Setup Butterfly Mode (glider application)

Q) What should I tell PowerBox is Center for servos run off the Throttle stick?

A) You have to center the throttle stick in the middle. Take your servo monitor in the transmitter to find the middle.

Q) What is center for a Gear channel?

A) Take a regular (stick) channel to teach the end and center positions. After you have done that you connect the PowerBox back to the gear channel.
